

To navigate the panoramas ("i360tours®"), place cursor on image and click to stop auto-rotation. Click, hold left button and drag cursor to look left, right, up or down. A "java-enabled" browser with pop up block turned off is needed to view the "i360tours®".

When the pop-up window opens, the Tour will be running in the AutoViewMode. If you avoid clicking on the viewing window, the navigation buttons within the viewing window and selections listed in the "drop down" menu, the Tour will run through all available i360tours® and then loop back to the beginning. The time span to completely run through the Tour in the AutoViewMode is determined by the number of i360tours®. It takes approx. 25 seconds for each i360tour®. Your viewing experience can be expedited by navigating manually with the navigation buttons.

The actions generated by the navigation buttons located within the viewing window are as follows from left to right...

-  PanLeft
-  PanRight
-  PanUp
-  PanDown
-  ZoomIn
-  ZoomOut
-  PreviousScene
-  NextScene
-  ResetScene
-  StopScene
-  CloseWindow
-  StopAutoTour
-  PlayAutoTour
